CONDITION OF THE CROPS

REPORTS TO THE AGRICULTURAL DEPARTMENT.

Reduction in Acreage of Corn Planted -Wheat Far Above the Ten-Year Average, While Oats Are Below.

Preliminary crop reports have been made to the statistician of the Department of Agriculture. The acreage of corn planted indicates a reduction of about 400,000 acres, or .5 per cent, from the area planted last year. Of the twenty-two states having one million acres or upward in corn in 1900 twelve show a decrease of about 1,300,000 acres, while in the remaining ten an increase of about 900,000 acres is shown. Of the twenty-three states and territories having less than one million acres in corn in 1900 only six report smaller acreages than were planted last year. The average condition of the growing crop is \$1.3, as compared with 89.5 on July 1, 1900; 86.5 at

the corresponding date in 1899, and a ten-

year average of 30.3, Improvement in Wheat. The condition of winter wheat improved during June, being 88.3 on July 1, as compared with 87.8 on June 1, 80.8 on July 1, 1900; 65.6 at the corresponding date in 1899, and a ten-year average of 80.2. All the important winter wheat states share in this improvement except Pennsylvania, Ohio and Maryland, in which the condition

declined during the month, 3, 2 and 5 points, respectively. The average condition of spring wheat also improved during the month, being 95.6 on July 1, as compared with 92 one month ago; 55.2 on July 1, 1900; 91.7 at the cor-responding date in 1809, and a ten-year average of 85.6. The condition in Nebraska is 89, Iowa 92, Minnesota 96, South Dakota and North Dakota 100.

The condition of spring and winter wheat combined on July 1 was 91.1, against 98.6 on July 1, 1900, and 76.2 at the correspondon July 1, 1900, and 16.2 at the correspond-ing date in 1809.

The amount of wheat remaining in the hands of farmers on July 1 is estimated at about 31,000,000 bushels, or the equivalent of 5.85 per cent of the crop of 1900.

Barley and Oats.

The average condition of the oat crop is

83.7, as compared with 85.3 one month ago; 85.5 on July 1, 1900; 90 at the corresponding date in 1899, and a ten-year average of The average condition of barley is 91.3, as against 91.0 one month ago; 76.3 on July/ 1, 1900; 92 at the corresponding date in 1899, and a ten-year average of 87.1. All the principal states except Wisconsin and Kansas, in which there were declines of 1 and 21 points, respectively, and New York, in which the condition has remained stationary, show an improvement during the month, and, except in the two states first

named, and in lowa, where the condition on July 1 corresponds with the ten-year average, their averages of condition are all above their respective ten-year averages. The average condition of winter rye is 93.6, as compared with 86.6 on July 1, 1900 year average, except in New York, where

The condition of tobacco is 1 point above the ten-year average in Ohio, 4 in Virginia and 7 in Maryland. On the other

hand, 2 points below in Kentucky, 3 in Pennsylvania, 4 in North Carolina and 12

in Wisconsin, while in Tennessee it cor-responds with the ten-year average for that Reports on the hay crop are in the main unfavorable, there being a decline from the condition as reported on the 1st of last month in a majority of the more important the month, and in several important states is considerably below the ten-year aver-ages. In some states, however, notably New York, Pennsylvania, California, South Dakota, Ohio, Michigan and Minnesota, the

condition is excellent, being 7, 7, 6, 9, 11, 5 and 6 points above their respective ten-year ise of more than an average crop, but in the apple-producing states the crop will be generally poor. The condition of grapes is
